EXPERIENCE

Cyntexa, *Associate Software Developer*

2021 (May) - Present

PROJECTS

Stripe Integration with Salesforce

- The business requirement was to create a Stripe Payment Gateway integration with salesforce allowing users to make credit card payments for their purchase.
- Created **LWC component** to enter card details and make payment via API callouts.

E - Learning Platform

- The business requirement was to create an E-Learning system, allowing users to access the courses along with the question bank.
- Created an **LWC component** with a view for users allowing them to access courses with their questions helping in managing the course listing and question bank easily.

Compliance Wizard

- The business requirement was to completely customize the Salesforce UI for its community portal.
- Worked on the dashboard module from scratch and created multiple **LWC Components** which included the use of **chart.js** and **SLDS library** to make the UI **responsive** as well.

Loan Management

- The client wanted to keep a track of potential customers interested in taking loans and also manage the loan agents and their travel expenses.
- Created custom objects to store the loan information and details of agents.
- Automated the process with the help of **Process Builder** and **Approval Process** for travel request and travel expense.
- Automated emails for loan approval and employee emails for travel expense approval. Generated multiple reports helping the client to manage the loan details and expenses easily.
